

In June 2017, the BCU Biology Department will offer a 3-credit field experience focusing on regional geology and native habitats of Hawaii. The course will examine two islands, the Big Island and Kauai. Daily field trips will be supplemented by evening lectures and discussions. Estimated cost for the entire trip (\$3900) includes flight, car rental, lodging, food, and summer tuition for full-time BCU

students. Students will keep a log of daily activities and complete assignments based on observations made during the trip. Grading will be based on one exam, the trip log, post-trip questions, and participation. Enrollment will initially be limited to 6, but could increase depending on interest.

A \$2000 deposit is required by **Jan. 23, 2017**, so air travel can be secured. **Save \$100** by paying deposit by **Nov. 23, 2016**.
